

# SOLUTION REQUIREMENTS.

<b>Project Name</b>	<b>IOT Based Smart Crop Protection System for Agriculture.</b>
<b>Team ID</b>	<b>PNT2022TMID25232</b>
<b>Date</b>	<b>25 NOV 2022</b>

## FUNCTIONAL REQUIREMENTS :

✚ Following are the functional requirements of the proposed solution.

<b>S.NO.</b>	<b>Functional Requirement.</b>	<b>Sub Requirement.</b>
<b>1.</b>	<b>User Visibility</b>	<b>Sense animals nearing the crop field &amp; sounds alarm to woo them away as well as sends SMS to farmer using cloud service.</b>
<b>2.</b>	<b>User Reception</b>	<b>The Data like values of Temperature, Humidity, Soil moisture Sensors are received via SMS.</b>
<b>3.</b>	<b>User Understanding</b>	<b>Based on the sensor data value to get the information about the present of farming land.</b>
<b>4.</b>	<b>User Action</b>	<b>The User needs take action like destruction of crop residues, deep plowing, crop rotation, fertilizers, strip cropping, scheduled planting operations.</b>

## NON-FUNCTIONAL REQUIREMENTS :

✚ Following are the non-functional requirements of the proposed solution.

<b>S.NO.</b>	<b>Non-Functional Requirement.</b>	<b>Description.</b>
<b>1.</b>	<b>Usability</b>	<b>Mobile Support Users must be able to interact in the same roles &amp; tasks on computers &amp; mobile devices where practical, given mobile capabilities.</b>
<b>2.</b>	<b>Security</b>	<b>Data requires secure access to must register and communicate securely on devices and authorized users of the system who exchange information must be able to do.</b>
<b>3.</b>	<b>Reliability</b>	<b>It has a capacity to recognize the disturbance near the field and doesn't give a false caution signal.</b>
<b>4.</b>	<b>Performance</b>	<b>Must provide acceptable response times to users regardless of the volume of data that is stored and the analytics that occurs in background. Bidirectional, near real-time communications must be supported. This requirement is related to the requirement to support industrial and device protocols at the edge.</b>
<b>5.</b>	<b>Availability</b>	<b>IOT Solutions and domains demand highly available systems for 24 x 7 operations. Isn't a critical production application, which means that operations or production don't go down if the IOT solution is down.</b>
<b>6.</b>	<b>Scalability</b>	<b>System must handle expanding load &amp; data retention needs that are based on the upscaling of the solution scope, such as extra manufacturing facilities and extra buildings.</b>
